www.linkedin.com/in/fabricio-rodriguez | https://fabriciorod.github.io

PROFESSIONAL SUMMARY

Senior Mobile Engineer with over 12 years of experience designing, programming, and testing high-traffic mobile applications for both Android and iOS. Proven ability to lead development cycles from concept to release, manage cross-platform parity, and implement rigorous QA automation strategies within agile environments.

SKILLS

- **iOS Development:** Swift, Objective-C, Xcode, tvOS, watchOS, SwiftUI.
- **Android Development:** Kotlin, Java, Android Studio, Jetpack Compose.
- **Architecture & Patterns:** CLEAN, MVVM, MVVM-C, VIPER, Offline Storage.
- **Testing & QA:** ISTQB Certified, Unit Testing, UI Testing (XCTest), Test Automation, TDD, Manual and Exploratory Testing.
- **DevOps & Distribution:** CI/CD Pipelines, App Store Connect, Google Play Console, TestFlight, Firebase, AppCenter.
- **APIs & Networking:** RESTful APIs, GraphQL, Retrofit, OkHttp, Alamofire, URLSession.
- **Agile Methodologies:** Scrum, Kanban.

PROFESSIONAL EXPERIENCE

Senior Mobile Engineer | Lumenalta, New York, US | May 2024 - May 2026

- Engineered core features using Kotlin, ensuring robust architecture, seamless data flows, and alignment with modern Android design principles.
- Drove development parity efforts for both iOS (Swift) and Android (Kotlin) versions of a high-traffic, music-focused social networking app to deliver a seamless, unified cross-platform experience.
- Led the UI/UX redesign and modernization of a leading global wellness and nutrition Android application, significantly boosting user engagement and interface responsiveness.
- Leveraged ISTQB-certified methodologies to own the end-to-end testing pipeline, performing extensive manual QA and exploratory testing to isolate complex edge cases in real-time social features and media playback.
- Elevated application reliability and performance by combining rigorous manual verification with the implementation of targeted automated unit and UI test suites.

Senior Mobile Developer | Gorilla Logic, San José CR | Mar 2017 - Feb 2024

- Developed high-end iOS applications for a diverse portfolio of clients, including Fortune 500 companies.
- Participated in multiple Scrum teams, collaborating across all development phases from feature design and task estimation to development, testing, and deployment.
- Led the automation of a legacy manual test plan using XCTest, presenting automation metrics to stakeholders to demonstrate business alignment and engineering ROI (iOS SDET Role).
- Conducted technical interviews for incoming iOS and Android developer candidates to maintain high talent benchmarks.
- Provided guidance on Apple's design principles, technology trends, and user interface guidelines through close collaboration with product design teams.
- Experience in end-to-end application development, covering the full lifecycle from concept to release.

Android & iOS Developer | RFH Software, San José CR | Jun 2013 - Dec 2016

- Development of custom Android and iOS apps to solve specific business challenges at different companies, mainly using Firebase platform.
- Java and Swift as main development languages.
- In-House app distribution and testing.
- App release process in App Store Connect and Google Play Console.
- Provide guidance on design principles on Android design principles and technology trends.

EDUCATION & CERTIFICATIONS

- **Bachelor in Business Informatics |** University of Costa Rica | 2010 - 2014
- **Certified Tester Foundation Level** | ISTQB I 2023
